Att. ER 4684

6 OCT 1983

Mr. Wallace J. Alspach
Technical Program Development Officer
Electromagnetic Fields Division
National Bureau of Standards
Boulder, Colorado 80303

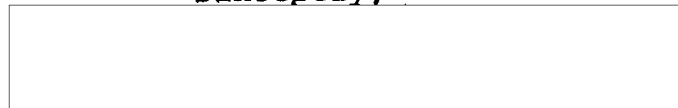

Dear Mr. Alspach:

In response to your letter to Mr. Casey of 23 September 1983, I have solicited expressions of interest in four offices of the Agency. In summary, our main interests in microwave detection and measurements are more concerned with low power than high power. Accordingly, I do not believe we have sufficient interest or need at this time to be of much help in establishment of your programs.

Should you arrange a technical conference on this subject among government and private sector investigators, I would be happy to receive an agenda. From that, it is possible that some portion of the conference might be interesting to some of our people and they may want to attend.

Thank you for making us aware of this program development at the National Bureau of Standards.

Sincerely,

R. E. Hineman
Deputy Director
for
Science and Technology
